1. **GENERAL**

   Public right-of-way shall be maintained in accordance with the City of Spokane. All tree planting and maintenance shall require the assistance of a licensed tree professional (SMC 10.25.010). The term "Contracted Arborist" shall be used in the remainder of this document to refer to the licensed tree professional. According to the American National Standards Institute Z 2017, or as amended, the tree protection zone (TPZ) is defined as a 10-foot radius from the trunk. Tree planting must be directly supervised by an ISA certified arborist or certified tree worker. Tree planting must be maintained at all times during construction. Alternative or modified fencing material may be required to meet construction and tree preservation objectives. The term "Contracted Arborist" shall be used in the remainder of this document to refer to the licensed tree professional. According to the American National Standards Institute Z 2017, or as amended, the tree protection zone (TPZ) is defined as a 10-foot radius from the trunk. Tree planting must be directly supervised by an ISA certified arborist or certified tree worker. Tree planting must be maintained at all times during construction. Alternative or modified fencing material may be required to meet construction and tree preservation objectives.

2. **TREE PROTECTION ZONE**

   Tree protection zones shall be marked with a minimum of 10-foot radius from the trunk. Alternative or modified fencing material may be required to meet construction and tree preservation objectives. The term "Contracted Arborist" shall be used in the remainder of this document to refer to the licensed tree professional. According to the American National Standards Institute Z 2017, or as amended, the tree protection zone (TPZ) is defined as a 10-foot radius from the trunk.    - **EXISTING OFFICE**
   - **NEW ADDITION**
   - **PARKING AREA**
   - **PUBLIC ALLEY**
   - **NEW COMMERCIAL/LIGHT INDUSTRIAL INCUBATOR BUILDING**

The site plan includes a new commercial/light industrial incubator building, a new addition, and a parking area. The site plan is drawn to scale and includes all necessary dimensions and notes. The site plan is subject to change and may be revised as necessary. The site plan is intended to provide a clear and accurate representation of the proposed development. The construction professional may require additional notes and specifications to ensure a successful project.
