

Hanging Art with the picture hanging rails at the Downtown Library

Please note the distances listed in the photos at left. You may hang at different heights, these photos are just to give a sense of the space. Some people use wire and some use fishing line. With fishing line you will want to purchase a weight sufficient for weight of the piece you are hanging. For fishing line I usually do a triangle up from the piece.

Wire

Fishing Line (two lines shown because there are two pieces hung here, see smaller image)
