

Embroidered Snowflake Card - Punching Templates

Cut out and place one of the patterns on the right over your card and use a thumb tack to punch out the holes in your cardstock - remember to place something soft underneath (foam or a pillow). After all holes are punched, pencil in light guidelines (left) on your card so you can follow along as you're stitching. You can erase as you're stitching or, if you feel confident, just use the image at left to guide you as you stitch (no guidelines). Don't worry about how the back of your cards looks, it's part of the process! Refer to the Library's YouTube page for a corresponding instructional video for these cards: <https://bit.ly/3fZ3YWk>
